

Errata for:

## Residential Design using AutoCAD 2009 by Daniel John Stine

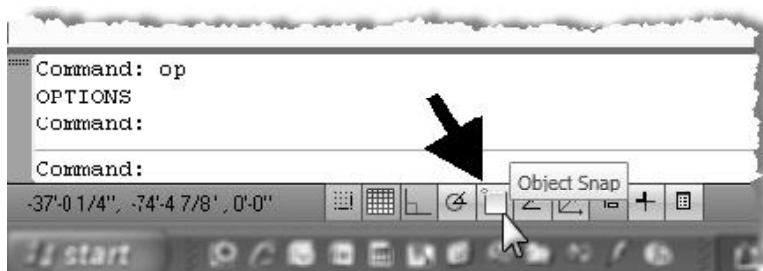

- AutoCAD drawing window has traditionally had a black background. Many users will change the default “off white” to black because that is what they have become accustomed to. Also, many layer color standards have been established based on the background being black. Some colors are hard to see with the new “off white” background, such as yellow. Note that color 7 is special in that it is white on a black background and black on a white background automatically. This book uses colors geared more towards a black background. If you would like to change the background color to black in model space, do the following:

1. Type options; press Enter.
2. Click the display tab.
3. Click colors button.
4. Make sure model background is picked.
5. Set the color to black.
6. Close the dialogs.

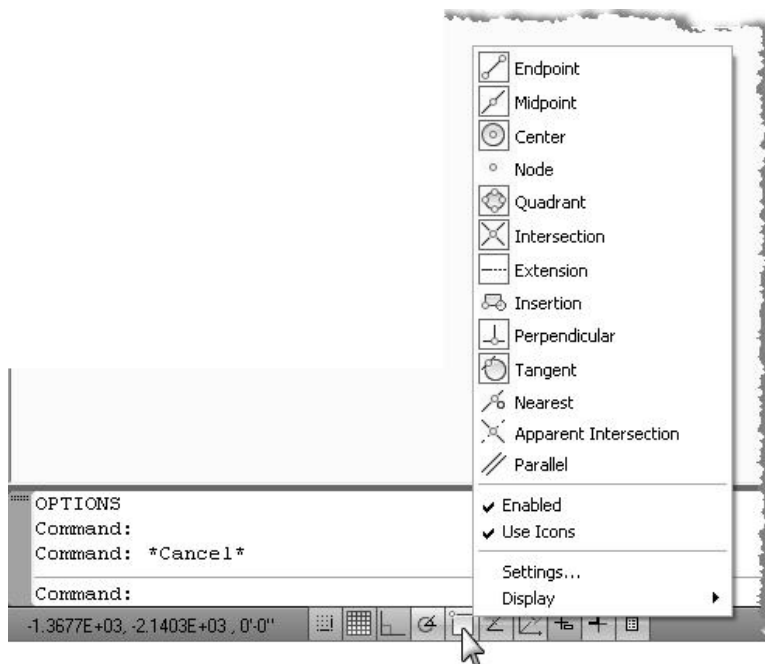

This will be for all drawings on this computer.

Pg.

2-16 Figure 2-2.2 is pointing at the wrong icon, the one below is correct.

2-18 Figure 2-1.4 has an error similar to the one mentioned above (i.e., wrong icon identified).

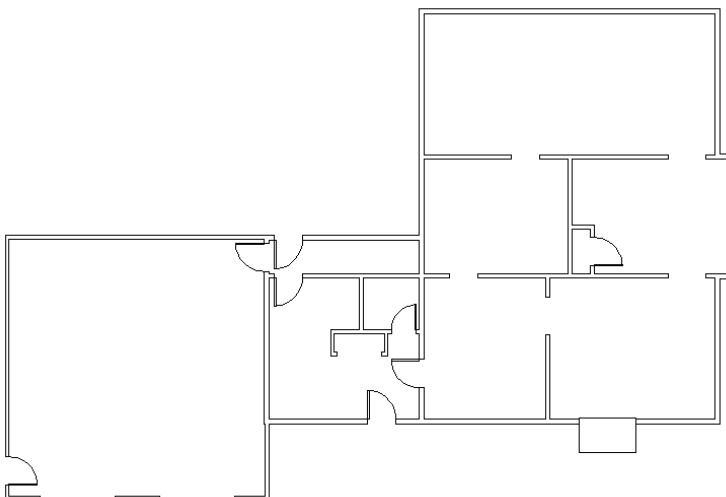

2-18 Step 1 instructs the reader to open a file on the CD that does not exist. The file created in the previous exercise will work. The intent was to use a file that had the same proportions as the images in Exercise 2-2 to avoid confusion. The missing file is included in this zipfile.

3-34 Step 9: The second "OK" should be replaced with "click the **X** in the upper corner".

3-35 Same as the previous step: replace "OK" with "click the **X** in the upper corner".

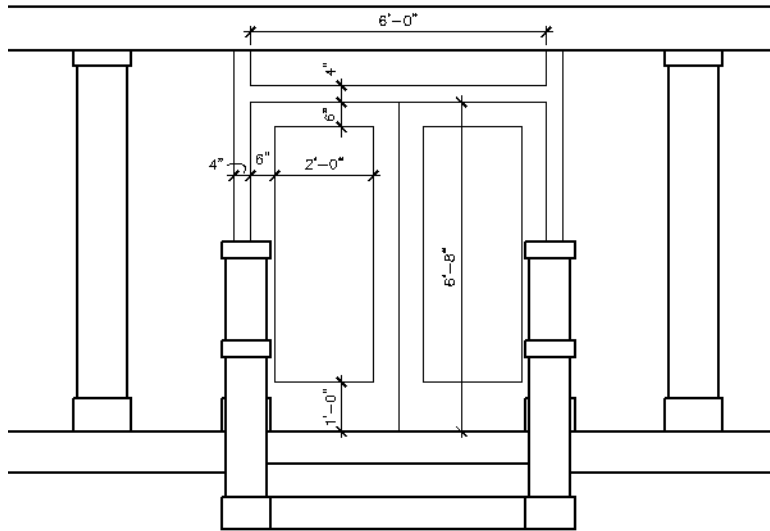

4-31 Fig. 4-2.12: The stairwell wall, near back door, is in the wrong location (corrected image shown below).

4-33 Step 25: Replace “Door-48” with “Pocket-48”.

5-7 Last paragraph: Change “page 4-63” to “page 4-62”

5-29 Fig. 5-3.1: The door height dim. should be 6'-8", rather than 7'-0" (see corrected image below).

6-4 Step 7: Add item k:

k. Make the footings, below the foundation walls, 2'0" wide.

9-12 Step 31: Change “Figure 9-1.4” to “Figure 9-1.7”

Index – 3 Lesson 6, V6-B: Change “External references” to “Array for stairs”
